#### Advice on protection against fire and explosion

Take precautionary measures against static discharges. Vapours may form explosive mixtures with air. Pressurized container: protect from sunlight and do not expose to temperatures exceeding 50 °C. Do not pierce or burn, even after use. Do not spray on naked flames or any incandescent material.

#### Advice on general occupational hygiene

Work in well-ventilated zones or use proper respiratory protection. Do not eat, drink, smoke or sneeze at the workplace. Wash hands before breaks and after work. Take off contaminated clothing and wash it before reuse. Do not breathe gas/fumes/vapour/spray. Avoid contact with skin and eyes.

#### Further information on handling

Heating causes rise in pressure with risk of bursting.  
Remove all sources of ignition.  
After use replace the closing cap immediately.

### 7.2. Conditions for safe storage, including any incompatibilities

#### Requirements for storage rooms and vessels

Keep container tightly closed in a cool, well-ventilated place.  $T < 50\text{ °C}$   
Observe the storage regulations of the TRGS 300 for flammable aerosols.

#### Hints on joint storage

Note joint storage restrictions of Technical Rules TRGS 509 and TRGS 510.

Provide adequate ventilation as well as local exhaust at critical locations. Have eye showers and safety shower ready.

#### Individual protection measures, such as personal protective equipment

##### Eye/face protection

Tightly sealed safety glasses. EN 166

##### Hand protection

Protect skin by using skin protective cream. Tested protective gloves are to be worn: EN ISO 374  
The most suitable glove should be chosen in consultation with the glove supplier / manufacturer who can provide information on the breakthrough time of the glove material.  
Suitable material: NBR (Nitrile rubber).  
Breakthrough times and swelling properties of the material must be taken into consideration.  
For special purposes, it is recommended to check the resistance to chemicals of the protective gloves mentioned above together with the supplier of these gloves.  
Observe the wear time limits as specified by the manufacturer.

##### Skin protection

When used as intended no extra body protection is required. Protective clothing: Body protection must be selected depending on the activity and possible impact. EN 13034/6

##### Respiratory protection

With correct and proper use, and under normal conditions, breathing protection is not required. If technical exhaust or ventilation measures are not possible or insufficient, respiratory protection must be worn. Suitable respiratory protective equipment: Self-contained respirator (breathing apparatus).  
In principle it's not allowed to use AX-filters against organic substance mixtures.

##### Thermal hazards

Pressurised container: May burst if heated.

##### Environmental exposure controls

Leakage into the environment must be prevented. Do not allow uncontrolled leakage of product into the environment.
